

Bewertungsmatrix WebFrameworks Projektarbeit

Port, design & implementation of core functionality (puzzle game logic) -> 12 pts

- Split code into functions ("code quality") - 2pts
- Wrapping everything in one or more components - 2pts
- Game logic is working
 - o Puzzle pieces can be swapped - 4pts
 - o puzzle can be solved - 4pts

Login (Authentication token, logout, ...), signup, profile page, site navigation -> 12 pts

- Login functionality - 2pts
- Signup - 2pts
- Profile page - 4pts
- Site navigation - 4pts

High Score page + InMemory DB attachment -> 8 pts

- Highscore page - 4pts
- InMemory DB usage - 4pts

good UI styling (usage of material libraries, useful design & theming [colors]) -> 4pts

- Using the Angular Material default theming is sufficient. An example for no points would be to use no theming at all. It's not necessary to switch themes!

Logo, "realistic" FAQ -> 4pts

- Check if a Logo (whatever picture) is used - 2pts
- Check the FAQ text. Usage of "Lorem Ipsur ..." results in no points - 2pts

optional bonus points for integration the second puzzle -> 5 pts
